

## ***Lumbering Beyond Expectations: Who We Are at Kimal***

When people hear Kimal Lumber, they might picture rows of 2x4s, stacks of plywood, and the scent of fresh-cut wood. And sure, we love a good stick of lumber as much as the next person — it's in our name, after all. But at Kimal, "Lumber" is only the beginning of the story.

We don't just stock it. We don't just sell it. We build on it.

### **At Kimal, we believe in "Lumbering" Forward.**

That doesn't mean moving slowly — quite the opposite. We lumber forward with purpose: delivering smart solutions, anticipating customer needs, and executing with excellence every single day. It's how we've earned the trust of builders, contractors, and homeowners alike. And it's how we plan to grow — not just in volume, but in value.

Yes, we've got your framing needs covered. But we also offer Trusses, windows, doors, millwork, hardware, engineered wood, and so much more.

Our team? Packed with pros who don't just take orders — **they take ownership.**

Our branches? Connected by more than trucks — we share a culture of service and a commitment to doing things right, the first time.

- ☐ We strive to be more than just a place where you buy lumber.
- ☐ We want to be where you find solutions.
- ☐ Where you get answers.
- ☐ Where you work with people who care about your project like it's their own.
- ☐ Where excellence isn't a buzzword — it's the way we work.

So, the next time someone asks, "Do you just sell lumber?" We smile and say,

"If by 'just lumber' you mean doors, windows, trusses, hardware, expert advice, and follow-through... then yeah, just lumber."
